

Assign. #2

Safety Posters

Directions:

- 1) Pick a safety topic from the safety handout given to you in class.
- 2) Try to make a catchy title for the safety topic that you want to promote.

Example:
 - Chosen Topic: Fire Safety
 - Catchy Title: Be Cool About Fire Safety!
- 3) A couple of the safety messages for the chosen topic need to be present on the poster.
- 4) Choose a piece of colored paper for the background. Use colored pencils, markers, glue, scissors, magazines, and other art supplies in order to create a meaningful poster.
- 5) All of the classes will have the opportunity to have their posters featured around the room for a couple of days. Hopefully all the safety messages will captivate your classmates' interest and provide little reminders of the importance of lab safety.

Poster Grade
